CELEBRATING THE SPIRIT OF CINEMA BY, WITH AND ABOUT PEOPLE WITH DISABILITIES

Ability Foundation proudly presents AbilityFEST 2015, India International Disability Film Festival, from 28 September to 1 October 2015 at Sathyam Cinemas. This is the 6th edition of the festival, and we would like to thank everyone for coming in large numbers over the years to watch each screening.

AbilityFEST is held every two years with the purpose of:

- Giving people the unique opportunity of watching movies from all over the world that sensitise the public to disability. These movies are not only well appreciated in global film festivals, but are beautiful in their portrayal of life and disability.

- Providing access to movies, by introducing techniques like captioning and audio description. With these techniques, complete accessibility of movies is ensured. People with and without disabilities experience the magic of cinema together. Access includes holding the Fest at a disabled-friendly location as well.

- Creating awareness about disability through cinema. Cinema is a popular medium of informing and entertaining mass audiences. What better way to celebrate the diversity?

AbilityFEST 2015 brings to the film loving public a host of award winning feature films, documentaries and short films from around the world by, with and about people with disabilities. Award winning films from across the world have been selected to give this year’s Fest a global perspective of disability and inclusion.

This year we have two offerings from India - the highly acclaimed Margarita with a Straw, for the first time with audio description for the blind and the Tamil film Thiran (Talent). Our other features include the poignant Iranian films The Painting pool and M for motherly, as well as the thought provoking film from U.S.A, Dolphin Tale.

AbilityFEST 2015 also includes the screening of shortlisted one minute films from the competitive section “60 seconds to fame!”, The theme this year was “Coming together: hand-in-hand!”

Be a part of AbilityFEST 2015... see you at the movies!
When we are celebrating 20th anniversary of Ability Foundation, it is time to take stock of the progress of AbilityFEST, India International Disability Film Festival. We started the festival 10 years ago in 2005. I could not attend the first festival because I was involved in an accident which made me ‘disabled.’ This enabled me to understand them, the disabled and be one with them. However I made it a point to attend all the subsequent events. We had to change the venue in the first couple of years. But now, we have our screenings at Sathyam cinemas. We are grateful to the SPI cinemas management for making a theatre available for our bi-annual screenings.

This is the sixth edition of our festival, held every alternate year. This festival has now become highly recognised among international disability film festivals held globally. However it continues to be non-competitive. Perhaps in the coming years we will plan to make it competitive at least for the national entries and also increase the venues to other centres. This year we could not get many national entries. We hope to overcome this in the coming years. Perhaps if a competition will held many will enter.

The audience participation is the most important aspect of any Film Festival from this point of view. We are happy that the Chennai audience, both the general public and school kids, are patronising this festival with their full support. We hope they will continue to do so.

Our grateful thanks to all those who have been supporting our event, in the hope of building an inclusive society.
Celebrating “India International Disability Festival?” - AbilityFEST 2015 truly portrays our constant and ardent desire in sensitizing the issue of disability amongst many, and what better medium to choose from than Cinema. Capturing the attention even if it is for a period of time, a film with a strong message has the greatest potential in transforming the mindset of the viewers at large. In a country where cinema is worshiped equivalent to religion, this powerful tool has time after time proved important in creating massive awareness on various concerns and our Fest stands as a strong testimony to it by promoting Universal Access.

Film is the greatest educational medium the world has ever known - Preston Sturges

We as a team are honored to play a catalytic role once again, as we are all set to successfully roll out the sixth edition of AbilityFEST in October. Handpicked from the very best, a variety of award winning films and documentaries from across the world offer a global perspective on disability and inclusion appealing to all. Scheduled for four, full, consecutive days, the screenings from varying cultures and backgrounds will leave the audience enthralled.

Our persistent efforts over the years, have made us grow by leaps and bounds and we at Ability Foundation will continue to educate the public on disability and change the way of thinking. Through our high profile event, we are sure to impact many lives and achieve our overall mission of an inclusive society in the near future.
This time, AbilityFEST 2015, coincides with 20 years of Ability Foundation! Double the celebration for us! A feeling of elation fills the air. From being a fledgling in the film festival circuit, to this sixth edition – we have really seen strides take place. Our feelings of trepidation and anticipation however, remain the same as they were, when we took our first baby steps in 2005.

A lot of developments have happened in the Indian movie scenario, that we are right proud of... from nowhere, we are now somewhere.

Every Thursday, across all Sathyam Cinema, movies are captioned. Audio description is now, slowly but steadily, gained foothold and beginning to be recognized and appreciated.

If in Take One of AbilityFEST, we did the Silent Movies, just to make the movie loving public enjoy the great classics and watch films the way deaf people watched them, then in the few subsequent Takes, we brought you the silent classics with musical presentations, live on stage, specially composed for the occasion and beautifully rendered by Sriram Parashuram, as well as a presentation by the students of A R Rahman.

Now, we find – during the course of bringing you Take Six, several makers of blockbusters and technical giants like Real Image, themselves coming forward with super hit films that they want audio described for our Fest. Overseas film makers express their interest in wanting to be present. Sign language is a popular, sought after aside, desired by the public... keen to acquire skills in this extra language. All of which, have made the process of editing this Fest, near perfect... a crisply presented package... awaiting indulgence by you all... the discerning public to take this forward to becoming a runaway success.
For us at Ability Foundation, the enthusiasm with which we began the Foundation itself... working towards an equal society continues. No matter what activity we undertake – be it in the sphere of education, employment, recreation, culture or policy – to walk hand in hand... to work shoulder to shoulder... Where every man, woman and child with disability is considered on par with their non-disabled brethren. Not as special or different people, but just the same as everyone else, just requiring some considerations and an equitable playing field. Not to be compared with, but to be celebrated along with, as contributing, sought after members of society. I do not know if I will live to see the day, but I am thrilled that I have lived to see the difference between the then and the now... just as in a decade earlier.

So, here, in Take 6, of AbilityFEST 2015, the “action” has begun... and it’s all at your end. To enjoy and take pleasure in... for four full days of four full show times.

I eagerly await your reviews.

This is the 6th edition of AbilityFEST. I’m really happy that we have been able to consistently do this and it has gained importance of its own in the midst of many film festivals in our country. The difference being, AbilityFEST screens films that are either talking about disability or are made by people who are disabled.

In the last few years our mission has been to create an awareness that disability needs to be portrayed correctly in the media without it being an element of sympathy. We have come a long way in this mission as in the recent past India has produced several films including main stream films with a disabled person as the main character. It has been heartwarming to see this growth.

REVATHY
Recently I worked in a mainstream film, *Margarita with a Straw*, where the director Shonali Bose beautifully and sensitively tells the story of a young girl affected by cerebral palsy trying to come to terms with her sexuality. It is a very bold theme, told with such truth and sensitivity. The response that the film got all over India reiterates the fact that when a film has a soul it touches the viewers and is accepted in its totality. It also creates a platform to talk about issues related to a disabled person. Persons with disability are better understood and accepted as people who have the same emotions, issues and relationships as anyone else.

Personally, I feel that *Margarita with a Straw* as a film is a milestone in Indian films and I am proud to have been a part of it.

AbilityFEST has also been a pioneer in making film viewing accessible to all which is what we at Ability Foundation strive for in every aspect of the society. The subtitles help hearing impaired persons to enjoy the film to its fullest and audio description makes visually impaired persons view the film in its completeness. The success we had with *Tare Zameen Par* in 2007 with audio description is something unforgettable. We had a full audience where blind people who had watched the film before told us that the experience of watching the film with the audio description made them enjoy it to the fullest.

Entertainment is for all and movies are the most popular one. It is important to make this accessible to all. We live in a world where technology can make anything possible. It is up to us to put that extra effort to make this beautiful medium of entertainment accessible to all. AbilityFEST strives to do so.
Happiness is not the absence of problems, it’s the ability to deal with them. We should all choose not to place the “Dis” in our ability. Sometimes life knocks you down - get up, get up!! There should be no place in our society for prejudice of any kind, yet those with disabilities are often not given equal rights and opportunities. Is the cause ‘ignorance or indifference’ - either is not acceptable.

With a focus on abilities rather than disabilities, ‘Ability Foundation’ has improved the quality of life for those with visible and invisible challenges, paving the way to possibilities. They continue to work with those facing diverse mobility, sensory and communication challenges as well as mental health issues and addictions, which often compound disabilities. We can all take pride in the work ‘Ability Foundation’ has accomplished.

Yet, there is more to be done, which is why it is good not only to celebrate our successes but to look forward at what still must be done. As long as we never forget that every life is a miracle and each person has something to contribute, we will succeed.

Can your thoughts create magic on film when you’ve got a minute to win it? AbilityFEST’s “60 Seconds to Fame!” challenges just that. Innovation, perceptions and attitudes are showcased in just sixty seconds as creative and sensitive persons from across the country try and harness their potential. This year, entries have come from nineteen states across the country by people with, and without, disabilities. They range from talented film makers to amateur students wishing to use their creativity to make a difference in society.

The theme of the competition for this edition is “Coming Together: Hand-in-Hand”. As we go through the course of our lives, our experiences are many. We meet people. We make friends. Something almost magical happens. Dissimilarities melt away... like being disabled or non-disabled. Diversities are understood. And celebrated. Disabled or non-disabled, we are all people first. With the same joys, sorrows, likes, dislikes, hopes, despair, ambition, dreams, aspirations, wants & needs, like anyone else. People with disabilities are part of the same society, have their own space under the sun-same as anyone else.

Often, for a person with disability, several things come in the way of being friends with a non-disabled person-as equals. The barriers—both physical and attitudinal are many. Understanding the other person, sharing a joke or a problem is a unique barrier-breaker. There is no underestimating the powers of togetherness. Together, we can march on, achieve, and enjoy life, so much more: hand-in-hand. Hand in hand through good times and bad, through thick and thin, joys and sorrows.

It becomes such that, there is no “me” and “you”. It becomes “we” and “us”. However, for a person with disability, a little more empathy, sensitivity and above all accessibility of the facilities are important. Only then can we enjoy a truly equitable and balanced life. But these are not always available for persons with disabilities to realise all that s/he wants to. These have to be made available & accessible — with sensitivity & empathy as well as a matter of rights. These requirements will be required everywhere — for our classmates in school/college; for our colleagues at the workplace; our pals/friends in life, sharing simple pleasures of going to a movie, or dinner or a holiday together, appreciating one another... all that you can think of.

Ability Foundation’s vision is to make possible a society where people with and without disabilities walk hand in hand, work shoulder to shoulder and are accepted as equals; where help comes out of empathy, not sympathy as a matter of course.

Thus our theme this year... “Coming Together... hand-in-hand” gave people the freedom to unleash their creativity... just have their say... in 60 seconds... about challenging stereotypes, about changing preconceived notions, about opening up fresh vistas and thinking as well as opening up people’s minds with their innovative thinking. Overcoming all prejudices and creating an equitable as well as equal society—where every member of society enjoys a level playing field—with dignity, joy and as a matter of right. The following are the shortlisted movies which will be screened at AbilityFEST 2015.

**THIS ‘ABILITY’**
SIBI PANICKER
Kerala
sibi.airlove@gmail.com

Among the general public, disability is still a stigma. And this film is about that stigma which prevents us from lending a helping hand at the right time.

**VEERAM** - The rasam for warriors
MILANRAJENDRAN

A disabled person’s excitement of playing a game fades away, until his friend helps him.
**MEMBERS OF THE JURY**

**JAYA BACHCHAN** is undoubtedly one of Indian Cinema’s finest actors. A Padma Shri awardee, with an acting career that spans over five decades. While many of us remember her first Hindi film as the iconic protagonist in Guddi, she had entered the industry much earlier as a teenager, when she debuted in Satyajit Ray’s Mahanagar. Going beyond the realm of acting, she now dons the politician’s hat, as a Member of Parliament in the Rajya Sabha.

**PRAHLAD KAKAR.** One of the most iconic figures in the Indian advertising industry, Prahlad Kakar became a household name after the famous Pepsi commercial starring Amitabh Bachchan and Sachin Tendulkar. Today, he runs Genesis Film Productions, one of India’s leading production houses. Apart from advertising, Kakar is also well-known for his role as an assistant director in many Shyam Benegal films, such as Ankur and Bhumika. Outside the world of cinema, Kakar is passionate about preserving marine life and is the co-founder of Reefwatch Marine Conservation.

**A L VIJAY.** Well-known Tamil film director A L Vijay’s films such as Kireedam, Saivam and Madrasapattinam have cemented his position in the Tamil film industry. Disability has occupied a central theme in his films Deiva Thirumagal and Thandavam and shown Vijay to be the sensitive film maker that he is. Deiva Thirumagal in fact was screened for the first time with audio description at AbilityFEST 2011. Before becoming a feature film director, Vijay was an extremely successful ad film maker.
JUSTIN JESUDAS is the founder of “Life after Paralysis”, a trust that supports severely disabled persons and an active member of the Spinal Foundation, a Self-Help Group for persons with spinal cord injury. A market strategist and researcher by profession, he works for Cognizant Technology Solutions. He is an International-level swimmer and current national paralympic swimming champion. Playing wheelchair basketball and tennis are his other passions. Justin lives a full and colourful life and has come a long way since a car accident left him paralyzed neck down in 2009.

SRUTI MOHAPATRA is a tireless crusader for people with disabilities. She is the founder and chief executive of Swabhiman, a Bhubaneswar-based NGO, which has been working for the empowerment of people with disabilities in Odisha since 2001. Sruti has conceptualized a unique program for children and youth, Anjali, which has grown to become the only ‘Inclusive Children Festival” in India. From 1987 till 1996, she trained more than 3000 civil service aspirants. A devastating accident in 1987 left her a quadriplegic, but she surmounted the physical and emotional challenges that she faced, emerging with an indomitable desire to work with other people with disabilities. She has won over 65 awards for her life and service.
